

## Statistics for the SDGs - global indicators

<b>Name of the indicator</b>	<b>1.1.1 At -risk of poverty rate according to international poverty line</b>
<b>Sustainable Development Goal</b>	Goal 1. No poverty
<b>Target</b>	1.1 By 2030, eradicate extreme poverty for all people everywhere, currently measured as people living on less than \$1.25 a day
<b>Definition</b>	Percentage of persons in households whose daily income is below of international poverty threshold (i.e. \$1.9 daily).
<b>Unit</b>	percent [%]
<b>Available dimensions</b>	total
<b>Methodological explanations</b>	<p>Definition of indicator: The percentage of persons with disposable income lower than international poverty threshold, which is defined as daily disposable income in the amount of \$ 1.9.</p> <p>Aiming at elimination of differences in measuring poverty of people living in different countries purchasing power parities (PPP) were used.</p> <p>PPPs are types of currency exchange rates that are used to convert economic indicators expressed in local currencies to a common conventional currency.</p> <p>As the socio-economic realities evolve, the international poverty line has to be periodically updated.</p> <p>The current threshold was set in October 2015. Prior to that, in the 2008 update the World Bank set the international poverty line at \$1.25.</p>
