

Statistics for the SDGs - indicators for national priorities

| | |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Name of the indicator | 6.1.a Capacity of small water retention facilities |
| Sustainable Development Goal | Goal 6. Clear water and sanitation |
| Priority | Increase in disposable water resources, improvement of its ecological state and chemical quality |
| Definition | Volume of small water retention facilities. |
| Unit | dam3 |
| Available dimensions | total |
| Methodological explanations | <p>Small water retention aims at reduction of the outflow of surface waters, with a balance of the natural environment by ensuring the protection and restoration of water resources. It is the ability to collect, detain and drain water in a particular place and time on the surface or in the soil, groundwater, vegetation and forest bed.</p> <p>Facilities of small retention of water are buildings and equipment for keeping most of the water in its surface and by-surface circulation. They are:</p> |
| Data source | Ministry of Agriculture and Rural Development |
| Data availability | Annual data; since 2010 |
| Notes | <p>Source of data:</p> <ul style="list-style-type: none"> by 2016 - Ministry of Agriculture and Rural Development, since 2018 - Ministry of Maritime Economy and Inland Navigation. |
