

## Statistics for the SDGs - indicators for national priorities

|                                     |   |
|-------------------------------------|---|
| <b>Name of the indicator</b>        | <b>13.4.b Capacity of small water retention facilities</b>  |
| <b>Sustainable Development Goal</b> | Goal 13. Climate action   |
| <b>Priority</b>                     | Increasing the country's resilience to the effects of climate change  |
| <b>Definition</b>                   | Total volume of small water retention facilities.   |
| <b>Unit</b>                         | dam3  |
| <b>Available dimensions</b>         | total   |
| <b>Methodological explanations</b>  | <p>Small water retention aims at reduction of the outflow of surface waters, with a balance of the natural environment by ensuring the protection and restoration of water resources. It is the ability to collect, detain and drain water in a particular place and time on the surface or in the soil, groundwater, vegetation and forest bed.</p> <p>Facilities of small retention of water are buildings and equipment for keeping most of the water in its surface and by-surface circulation. They are:</p> |
