

## Statistics for the SDGs - indicators for national priorities

<b>Name of the indicator</b>	<b>13.2.c Installed electric power in RES installations</b>
<b>Sustainable Development Goal</b>	Goal 13. Climate action
<b>Priority</b>	Introduction of innovative technologies for exploiting available sources of energy, including development of geothermy
<b>Definition</b>	The indicator presents the total installed electric power in renewable energy source installations connected to the power distribution and power transmission grid (national power system).
<b>Unit</b>	megawatt
<b>Available dimensions</b>	total
<b>Methodological explanations</b>	<p><b>Installed electric power</b> – rated power of devices used to generate electricity (according to the Information of the President of the Energy Regulatory Office No. 44/2016 on the use of the term "installed electric power").</p> <p><b>Renewable energy source installations</b> - installations of a renewable energy source within the meaning of the Act on Renewable Energy Sources (Journal of Laws of 2022, item 1378, as amended), excluding co-combustion installations (multi-fuel combustion installations and dedicated multi-fuel combustion installations, if they specify in the reporting conventional fuel as the primary fuel) and thermal waste incineration installations, if they report conventional fuel as the primary fuel.</p> <p>More information available at: <a href="https://www.ure.waw.pl/">https://www.ure.waw.pl/</a></p>
<b>Data source</b>	Energy Market Agency S.A
<b>Data availability</b>	Annual data; since 2010
