

## Statistics for the SDGs - global indicators

<b>Name of the indicator</b>	<b>7.1.1 Proportion of population with access to electricity</b>
<b>Sustainable Development Goal</b>	Goal 7. Affordable and clean energy
<b>Target</b>	7.1 By 2030, ensure universal access to affordable, reliable and modern energy services
<b>Definition</b>	The indicator presents the percentage of population with access to electricity.
<b>Unit</b>	percent [%]
<b>Available dimensions</b>	total
<b>Methodological explanations</b>	<p>In international statistics, the <b>electricity</b> is considered as primary energy or as derived energy.</p> <p><b>The primary energy</b> is produced from natural sources such as: water, wind, solar energy, tides and waves energy.</p> <p><b>The derived energy</b> is produced from heat produced in the process of combustion of primary fuels (coal, natural gas) as well as from derived and renewable energy commodities and combustible wastes. The derived electricity can be also obtained from geothermal or solar heat.</p>
<b>Data source</b>	Statistics Poland
<b>Data availability</b>	Data for 2012.
