

## Statistics for the SDGs - indicators for national priorities

<b>Name of the indicator</b>	<b>5.1.b Gender employment gap (aged 25-54)</b>
<b>Sustainable Development Goal</b>	Goal 5. Gender equality
<b>Priority</b>	More complete fulfillment of the principle of women and men's equality
<b>Definition</b>	The indicator measures the difference between the employment rates of men and women aged 25 to 54.
<b>Unit</b>	p.p.
<b>Available dimensions</b>	total
<b>Methodological explanations</b>	<p>Data come from a sample survey: <b>Labour Force Survey (LFS)</b>. The survey is conducted on a quarterly basis, using the continuous observation method (movable survey week) what allows presenting the situation on the labour market during a whole quarter. The survey covers persons aged 15-89, who are members of households in dwellings selected on a random basis.</p> <p>The scope of the survey does not include household members staying (the total actual and planned stay is taken into account) 12 months or more abroad and in collective households (such as: employee hotels, student dormitories, boarding houses, social care centres etc.) and the homeless.</p> <p>In the context of economic activity - work is the main criterion in dividing the population, i.e. performing, holding or seeking work. According to the international standards, the three main categories are distinguished: employed, unemployed and economically inactive persons. The employed, unemployed are the economically active population.</p> <p>The employment rate is the share of employed in a given category in the total population of the same category.</p> <p>Among <b>the employed</b> are included all persons aged 15-89 who during the reference week:</p> <ol style="list-style-type: none"> <li>performed for at least one hour any work generating pay or income, i.e. were employed in a company/public institution or by a private employer, worked on their own (or leased) agricultural farm, or conducted their own economic activity outside agriculture, assisted (without pay) in conducting family agricultural farm or family economic activity outside agriculture,</li> <li>had work but did not perform it: <ul style="list-style-type: none"> <li>due to illness or holiday leave, leave related to parenthood (maternity, childcare, paternity or parental leave), organisation of working time (work system or overtime collection), training related to the performed work</li> <li>due to the seasonal character of the work, if they still regularly performed off-season their work or business conducting related tasks and responsibilities (excluding legal or administrative obligations)</li> <li>for other reasons, if the anticipated break in employment did not exceed 3 months</li> </ul> </li> </ol> <p>According to international standards, among employees are also included persons performing outwork and apprentices with whom enterprises or natural persons signed a contract for occupational training or learning skills for a particular job (if they receive a payment).</p> <p>The employed do not include: volunteers and interns who do not receive remuneration,</p>

## Statistics for the SDGs - indicators for national priorities

	people working in private engaged in the production of agricultural products solely or mainly for their own needs.
<b>Data source</b>	Statistics Poland
<b>Data availability</b>	Annual data; since 2010
<b>Notes</b>	Due to the implementation of methodological changes in the study, the LFS data from 2021 cannot be compared with the previous years (except for the data converted for the years 2010-2020).
