

## Statistics for the SDGs - indicators for national priorities

<b>Name of the indicator</b>	<b>7.2.a Renewable energy share in the gross final energy consumption</b>
<b>Sustainable Development Goal</b>	Goal 7. Affordable and clean energy
<b>Priority</b>	Creation of conditions for steady and sustainable development of energy sector; reduction of impact of energy sector on the environment
<b>Definition</b>	Ratio of gross final energy consumption from renewable sources to gross final energy consumption from all sources.
<b>Unit</b>	percent [%]
<b>Available dimensions</b>	total
<b>Methodological explanations</b>	<p><b>Energy from renewable sources</b> is the energy derived from natural, repetitive environmental processes, obtained from renewable non-fossil energy sources (energy: water, wind, solar heat, geothermal heat, waves, sea currents and tides and energy obtained from biomass, biogas, biofuels).</p> <p><b>Gross energy consumption</b> is a final consumption of energy carriers by the consumers (industry, transport sector, service sector, households, agriculture, forestry and fishery sector) including electricity and heat consumption by industry for electricity and heat generation as well as transformation and distribution losses.</p>
<b>Data source</b>	Statistics Poland
<b>Data availability</b>	Annual data; since 2010
