

## Statistics for the SDGs - indicators for national priorities

|                                     |  |
|-------------------------------------|--|
| <b>Name of the indicator</b>        | <b>6.2.b Industrial and municipal wastewater treated biologically, chemically and with increased biogene removal in % of wastewater requiring treatment</b>  |
| <b>Sustainable Development Goal</b> | Goal 6. Clear water and sanitation   |
| <b>Priority</b>                     | Creation of legal and financial mechanism conducive to rational use of water and implementation of water efficiency technologies as well as development and modernization of wastewater treatment plants   |
| <b>Definition</b>                   | Industrial and municipal wastewater treated biologically, chemically and with increased biogene removal in % of wastewater requiring treatment.  |
| <b>Unit</b>                         | percent [%]  |
| <b>Available dimensions</b>         | total  |
| <b>Methodological explanations</b>  | <p><b>Industrial wastewater</b> - sewage which is not residential sewage or rainwater, produced as a result of commercial, industrial, storage, transportation or service activity as well as water mixed with sewage produced by another entities discharged by sewage network owned by this plant.</p> <p><b>Municipal wastewater</b> - residential sewage or the mixture of residential sewage with industrial sewage or rainwater or thaw.</p> <p><b>Biologically treated wastewater</b> - wastewater treated using specific microflora and microfauna.</p> <p><b>Chemically treated wastewater</b> - wastewater treated using chemical methods, such as coagulation, absorption using active carbon and other methods, resulting in precipitation of certain soluble chemical compounds or in neutralisation of wastewater.</p> <p><b>Wastewater treated with increased biogene removal</b> - wastewater treated using technologies allowing for highly efficient removal of nitrogen, phosphorus or nitrogen and phosphorus jointly (biological methods with possible chemical reduction in phosphorus).</p> |
| <b>Data source</b>                  | Statistics Poland  |
| <b>Data availability</b>            | Annual data; since 2010  |
| <b>Notes</b>                        |  |
