

## Statistics for the SDGs - indicators for national priorities

Unit persons  Available dimentions  A road traffic accident is an event connected with the movement of vehicles on publi roads as a result of which death or injury of person occurred.  A road traffic accident fatality is understood as a person who died (as a result of injuries incurred) at the scene of the accident or within the course of 30 days.  A seriously injured person is a person who has suffered a loss of health in the form a) loss of sight, hearing, speech, fertility, other severe disability, severe incurable disease or long-term disease that is life-threatening, permanent mental illness, total or significant inability to work in the profession, in a permanent significant disfigurement of distortion of the body;  b) other injuries causing bodily harm or health disruption lasting longer than 7 days.	Name of the indicator	11.4.b Number of pedestrians and cyclists killed or seriously injured in road traffic accidents in a built-up area per 100 thous. population
Definition  Definition  Definition  Number of pedestrians and cyclists killed or seriously injured in a road accident in a bup area per year, per 100 thous, total population.  Unit  Persons  Available dimentions  A road traffic accident is an event connected with the movement of vehicles on publi roads as a result of which death or injury of person occurred.  A road traffic accident fatality is understood as a person who died (as a result of injuries incurred) at the scene of the accident or within the course of 30 days.  A seriously injured person is a person who has suffered a loss of health in the form a) loss of sight, hearing, speech, fertility, other severe disability, severe incurable disease or long-term disease that is life-threatening, permanent mental illness, total or significant inability to work in the profession, in a permanent significant disfigurement of distortion of the body;  b) other injuries causing bodily harm or health disruption lasting longer than 7 days.  Methodological explanations  To the built-up and urbanized area (based on geodesic area of the country according to the directions of use) belong the following areas:  - residential, - industrial, - other built-up, - urban undeveloped, - recreation and leisure, - transport (road, rail and others), - fossil land.  Data source  National Police Headquarters  Data availability  Annual data; since 2015  Notes  Data updated on  23-04-2024		Goal 11. Sustainable cities and communities
