

Statistics for the SDGs - global indicators

Name of the indicator Sustainable Development Goal 12. Responsible consumption and production 12.4 By 2020, achieve the environmentally sound management of chemicals and wastes throughout their life cycle, in accordance with agreed international frame and significantly reduce their release to air, water and soil in order to minimize the adverse impacts on human health and the environment		12.4.1 Number of parties to international multilateral environmental agreements on
Target 12.4 By 2020, achieve the environmentally sound management of chemicals an wastes throughout their life cycle, in accordance with agreed international frame and significantly reduce their release to air, water and soil in order to minimize the adverse impacts on human health and the environment The indicator assumes a value 1, when country is a signatory of international menvironmental agreements on hazardous waste and other chemicals, that meet commitments and obligations in transmitting information as required by each relagreement. Unit { 0, 1 } Available dimensions Poland is a part to the following international environmental agreements on hazawaste and other chemicals: • The Stockholm Convention on Persistent Organic Pollutants (POPs), signation and effective from May 2004 (signed by the President of Poland 30 September 2008, effective from 21 January 2009) • Protocol on Persistent Organic Pollutants (POPs) to the Geneva Convent yet ratified) • The Minamata Convention on Mercury, signed in Kumamoto and adopted (Poland has signed the Convention on 24 September 2014 in New York. Convention is not yet in force because of the onging ratification procedu. • The Basel Convention on the Prior Informed Consent Procedure for Hazardous Chemicals and Pesticides in International Trade), adopted in Rotterdam on 10 September 1938 (the Convention entered into force on February 2004, and Poland has acceded to it on September 14, 2005) the Ministry of Climate and Environment / Chief Inspectorate of Environmental F / the Ministry of Health Data availability Annual data since 2010.	Name of the indicator	
Target wastes throughout their life cycle, in accordance with agreed international frame and significantly reduce their release to air, water and soil in order to minimize the adverse impacts on human health and the environment. The indicator assumes a value 1, when country is a signatory of international menvironmental agreements on hazardous waste and other chemicals, that meet commitments and obligations in transmitting information as required by each relagreement. Unit {0,1} Available dimensions Poland is a part to the following international environmental agreements on hazwaste and other chemicals: • The Stockholm Convention on Persistent Organic Pollutants (POPs), signation and effective from May 2004 (signed by the President of Poland 30 September 2008, effective from 21 January 2009) • Protocol on Persistent Organic Pollutants (POPs) to the Geneva Conventy externatified) • The Minamata Convention on Mercury, signed in Kumamoto and adopted (Poland has signed the Convention on 24 September 2014 in New York. Convention is not yet in force because of the ongoing ratification procedu. • The Basel Convention on the Control of Transboundary Movements of H Wastes and Their Disposal, done at Basel on 22 March 1989 (until 2010 by 170 States, including Poland - 10 January 1992) • The Rotterdam Convention on the Prior Informed Consent Procedure for Hazardous Chemicals and Pesticides in International Trade), adopted in Rotterdam on 10 September 1998 (the Convention entered into force on February 2004, and Poland has acceded to it on September 14, 2005) the Ministry of Climate and Environment / Chief Inspectorate of Environmental F / the Ministry of Health Annual data since 2010.	•	Goal 12. Responsible consumption and production
Poland is a part to the following international environmental agreements on hazardous waste and other chemicals, that meet commitments and obligations in transmitting information as required by each rel agreement. Unit { 0 , 1 } Available dimensions Poland is a part to the following international environmental agreements on hazawaste and other chemicals: • The Stockholm Convention on Persistent Organic Pollutants (POPs), sign 2001 and effective from May 2004 (signed by the President of Poland 30 September 2008, effective from 21 January 2009) • Protocol on Persistent Organic Pollutants (POPs) to the Geneva Conventy et ratified) • The Minamata Convention on Mercury, signed in Kumamoto and adopted (Poland has signed the Convention on 24 September 2014 in New York. Convention is not yet in force because of the ongoing ratification procedu. • The Basel Convention on the Control of Transboundary Movements of H Wastes and Their Disposal, done at Basel on 22 March 1989 (until 2010 by 170 States, including Poland - 10 January 1992) • The Rotterdam Convention on the Prior Informed Consent Procedure for Hazardous Chemicals and Pesticides in International Trade), adopted in Rotterdam on 10 September 1998 (the Convention entered into force on February 2004, and Poland has acceded to it on September 14, 2005) Data source the Ministry of Climate and Environment / Chief Inspectorate of Environmental F / the Ministry of Health Annual data since 2010.	Target	12.4 By 2020, achieve the environmentally sound management of chemicals and all wastes throughout their life cycle, in accordance with agreed international frameworks, and significantly reduce their release to air, water and soil in order to minimize their adverse impacts on human health and the environment
Poland is a part to the following international environmental agreements on hazwaste and other chemicals: • The Stockholm Convention on Persistent Organic Pollutants (POPs), signed 2001 and effective from May 2004 (signed by the President of Poland 30 September 2008, effective from 21 January 2009) • Protocol on Persistent Organic Pollutants (POPs) to the Geneva Conventy yet ratified) • The Minamata Convention on Mercury, signed in Kumamoto and adopted (Poland has signed the Convention on 24 September 2014 in New York. Convention is not yet in force because of the ongoing ratification procedu. • The Basel Convention on the Control of Transboundary Movements of H. Wastes and Their Disposal, done at Basel on 22 March 1989 (until 2010 by 170 States, including Poland - 10 January 1992) • The Rotterdam Convention on the Prior Informed Consent Procedure for Hazardous Chemicals and Pesticides in International Trade), adopted in Rotterdam on 10 September 1998 (the Convention entered into force on February 2004, and Poland has acceded to it on September 14, 2005) Data source the Ministry of Climate and Environment / Chief Inspectorate of Environmental F / the Ministry of Health Annual data since 2010.	Definition	The indicator assumes a value 1, when country is a signatory of international multilateral environmental agreements on hazardous waste and other chemicals, that meet their commitments and obligations in transmitting information as required by each relevant agreement.
Poland is a part to the following international environmental agreements on hazwaste and other chemicals: • The Stockholm Convention on Persistent Organic Pollutants (POPs), sign 2001 and effective from May 2004 (signed by the President of Poland 30 September 2008, effective from 21 January 2009) • Protocol on Persistent Organic Pollutants (POPs) to the Geneva Conventy tratified) • The Minamata Convention on Mercury, signed in Kumamoto and adopted (Poland has signed the Convention on 24 September 2014 in New York. Convention is not yet in force because of the ongoing ratification procedu. • The Basel Convention on the Control of Transboundary Movements of H Wastes and Their Disposal, done at Basel on 22 March 1989 (until 2010 by 170 States, including Poland - 10 January 1992) • The Rotterdam Convention on the Prior Informed Consent Procedure for Hazardous Chemicals and Pesticides in International Trade), adopted in Rotterdam on 10 September 1998 (the Convention entered into force on February 2004, and Poland has acceded to it on September 14, 2005) Data source Data availability Annual data since 2010.	Unit	{0,1}
waste and other chemicals: • The Stockholm Convention on Persistent Organic Pollutants (POPs), sign 2001 and effective from May 2004 (signed by the President of Poland 30 September 2008, effective from 21 January 2009) • Protocol on Persistent Organic Pollutants (POPs) to the Geneva Conventy experition on Persistent Organic Pollutants (POPs) to the Geneva Conventy experition on Persistent Organic Pollutants (POPs) to the Geneva Conventy experition on Persistent Organic Pollutants (POPs) to the Geneva Conventy experition on Persistent Organic Pollutants (POPs) to the Geneva Conventy experition on Persistent Organic Pollutants (POPs) to the Geneva Conventy experition on Persistent Organic Pollutants (POPs) to the Geneva Conventy experition on Persistent Organic Pollutants (POPs) to the Geneva Conventy experition on Persistent Organic Pollutants (POPs), sign 2004, and Poland has set of Poland 2009) • The Ministry of Persistent Organic Pollutants (POPs), sign 2009) • The Ministry of Climate and Pollutants (POPs), sign 2009) • The Ministry of Climate and Environment / Chief Inspectorate of Environmental Form of Poland P	Available dimensions
